Pronunciation

Consonants and consonant clusters Some, but unfortunately not all, consonant sounds in Karen have a fairly close equivalent sound in English.

က	g	((like g as in g ate
ව	k	(((like k as in k ite
С	ng	((•	like ng as in si ng
9	sh	((•	like sh as in sh oe
S	d	((•	like d as in d oor
န	n	((•	like n as in n est
ဘ	b	(((like b as in b all
8	m	(((like m as in m ile
ယ	У	((•	like y as in y ellow

9 or _	r	(()	like r as in rat
0	I	(()	like I as in Iake
0	w	(ý.	like w as in w atch
သ	th	(((like th as in th anks
ဟ	h	((,	like h as in h ouse
ග			silent consonant, used to take on the sound of the acompanying vowel
2	ch	(((like ch as in ch ur ch

Aspirated and non aspirated sounds.

Aspirated sounds, (consonants with a "huh" sound in them) are common in English and there are examples in Karen. It is important to recognize these sounds as aspirates, because some Karen letters also have an non aspirated version, which is not the case in English. In keeping with the most commonly used forms of transliterating Karen to English, these aspirated which also have an un-aspirated version, are written here with the equivalent English consonant preceded with the letter 'h'.

20	hs	((like s as in s ight
∞	ht	(((like t as in truth
O	hp	((like p as in p ie

The unaspirated versions of these sounds are written here a the single letter

	taspirated reference of the control and written from a time emigre retter				
Ø	S	(((pronounced like a sharp s with the "uh" sound removed		

Also, some of the sounds can best be described as somewhere better two sounds found in English.

8	t	(((begans to be pronounced like a sharp t with the "uh" sound removed and ends with a sound more like d
O	р	(((begans to be pronounced like a sharp b with the "uh" sound removed and ends with a sound more like p
7	j	((v))	begans to be pronounced like a sharp j with the "uh" sound removed and ends with a sound more like ch

For the following sounds, you will need to work with a native speaker of Karen to get them correct.

O or -	gh	(((A fricative/guttural sound like "r" in French. Something like
(, 0, 1		- 7///	"g-er-ah" said together quickly
ಬ	hk	(((A guttural sound like the German "ch" as in "ach".
ည	ny	((sounds like "nee y_" said quickly using the vowel sound that
		7/1/	follows the y . As the Spanish "ñ", in "España".
00	ahh	1 1)	like ahh , the sound you would make after sitting down in a
		7///	comfortable chair after a long days work only shorter.

Consonant clusters

Generally, these are pronounced by combining the previous listed sounds together but said quickly. Many will dispute these transliterations but our aim here is to simplify and give non native speakers a start at communicating in Karen language.

မှ	mw	(()	sounds something like "m-w" said quickly
∞	hsg	1 11)	sounds something like "hs-g" said quickly. (For more
_ 1		\\ '\)	advanced learners, hsgh would be more accurate)
φ	hpw	13)	sounds something like "hp-w" said quickly. (For more
Y		\\' '')	advanced learners, hpgh would be more accurate)
φ	sg	((sounds something like "s-g" said quickly. (For more advanced
ľ	_	7///	learners, sgh would be more accurate)
()	pw	4.5	sounds something like "p-w" said quickly. (For more
Y		advanced learners, pgh would be more accurate)	
ဘ	bw	1 11)	sounds something like "b-w" said quickly. (For more
ال ا		7/1/	advanced learners, bgh would be more accurate)

The following are used in combination with single consonants and always follow the accompanying sound.

	W	(((sounds something like "w" said quickly
	r	((Like r as in rat
1	gh	((v)	A fricative/guttural sound like "r" in French. Something like "g-er-ah" said together quickly

The two combinations below are always pronounced as follows.

80	di	('))	sounds like the letter "D"
\mathbb{C}	maw	(((as read

Vowels

The following are the basic vowel sounds when spoken with the "neutral tone". The length and pitch of the sounds will of course vary according the the tone of each word.

word.						
-1	uh	(((pronounced with k', t', n', p', m', y', l', s'. Similar to a weak a in quota or the "ə" swah sound			
_]	ah	(((like a in st a r			
	eh	((like ai as in air or in the letter A			
-	ay	(((like ay as in d ay			
<u>•</u>	ee	(((like ee as in s ee			
īL	00	(((like oo as in t oo			
-	u	(((like u as in p u t			
0	oh	((like oe as in t oe			
o aw like aw as in law		like aw as in law				
(with no vowel)	а	1)))	like a as in " a rtist"			

Tones

Sgaw Karen is a tonal language with basically six different tones represented by five tone marks and a lack of a mark. Every syllable may be pronounced in the six different tones of voice, the meaning varying according to the tone in which it is pronounced.

As and example:
$$35 \text{ day} = \text{Frog}$$
 $300 \text{ day} = \text{Navel}$

In the phonetic transcription devised for this phrase book, the tonal system is represented by the following tone marks above or below the vowel of each syllable, (the vowel eh is used as an example with the consonant m):

Tone	Pitch	Karen	Symbol	e.g.	e.g. word	sound
low tone	Normal length, low tone	<u>_</u> S	<u>e</u> h	69	કિલ્જ	((•
			_	m <u>e</u> h	aw m <u>e</u> h	
low-short	Fairly short, low tone,	ىل	ęh	88	မဲဂ်သဉ်	1))
tone	ending with a glottal stop			mẹh	mẹh thạ	
short tone	very short, high-mid tone,	-:	ëh	် း	မ်းမုၢိဓိ	1 (1)
	ending with a glottal stop – a bit like: " <u>Ah!</u> , I forgot			mëh	mëh mu	
	my glasses."				kòh	
falling	falling tone	-\$	èh	δŞ	မဲဉ်သူမဲဉ်ဂီၤ	1)))
tone				mèh	mèh thoo	
					mèh ghāw	
long tone	long, mid tone	-1	ēh	61	કેર્જા	(()
				mēh	mēh t <u>a</u>	
no tone	Slightly rising tone	_	_	Θ	မတၤ	(((
			eh	meh	meh tā
